

# **DYNAPAC CONNECTS THE FUTURE**

**DYN@LINK**

With the introduction of Dyn@Link, Dynapac provides customers with a tool to monitor and manage their machine fleet efficiently and conveniently. The intelligent telematics system offers many possibilities to optimize fleet usage reducing maintenance costs, saving time and money.

**Three Versions available**

The new telematics Dyn@Link system is available in three versions:

- Dyn@Link
- Dyn@Link Advanced
- Dyn@Link Pro

All systems include the hardware with SIM-card, webpage access and a 36-month data connection package, which can be extended after three years.

**Dyn@Link Pro\***

Paving parameters linked to geographical location  
 - Working width  
 - Layer thickness  
 - "Asphalt temperature"

**Dyn@Link Advanced**

Fuel consumption

Machine parameters  
 - Engine parameters  
 - Distance travelled

Remote diagnostic

Interface with BPO from Volz Consulting GmbH

**Dyn@Link**

Working hours

Maintenance schedules

Geofence

*\* Available on large asphalt pavers, additional sensors might required*

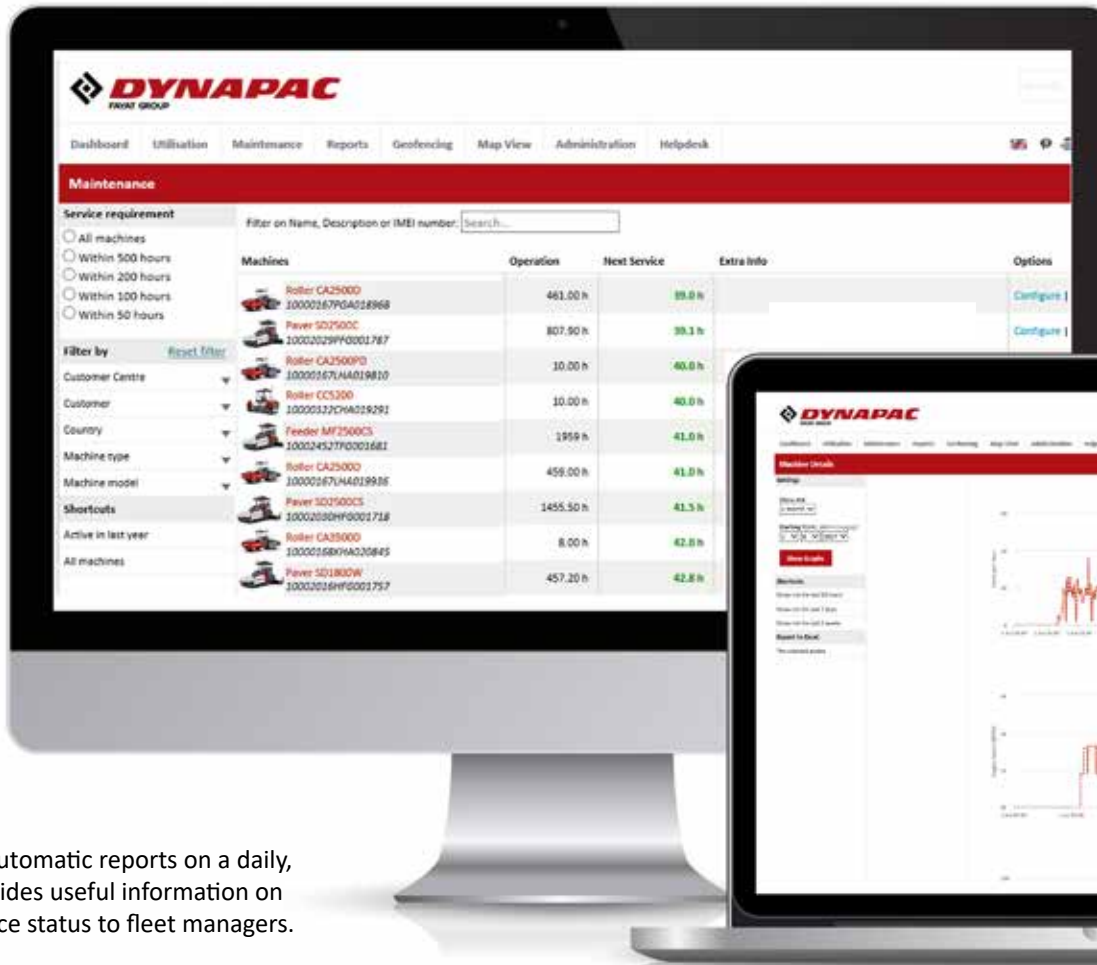

Dyn@Link allows managing your machines conveniently from the office, always having their latest status available. The user can access this information from anywhere at any time.

**Geo-fence**

After setting-up a geo-fence, the system automatically notifies Dyn@Link users when a machine enters or leaves predefined area.

**Reporting function**

Dyn@Link allows users to set-up automatic reports on a daily, weekly or monthly basis. This provides useful information on fuel consumption, usage and service status to fleet managers.

### All machine information at a glance

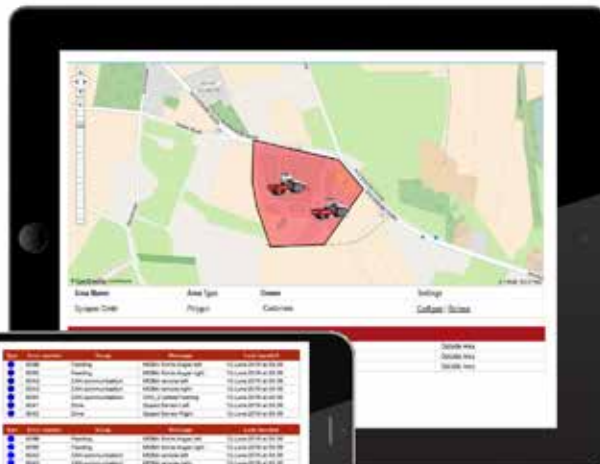

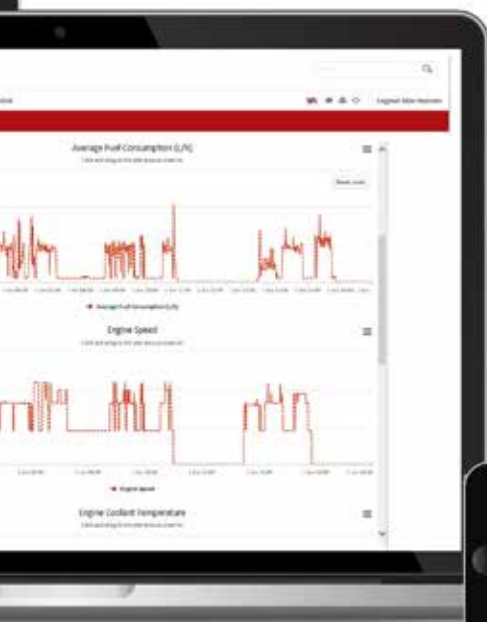

The dashboard includes all machines, along with important information such as position, fuel and Ad-blue levels, service status and map view. Thanks to the online portal and the Dyn@Link app, users can access this information from anywhere and at any time.

### Customize the tool for your needs

The user-friendly webpage is easy to learn and the various filters and personal setting options for graphs and tables allow you to adapt the webpage to your individual requirements.

### Remote diagnostics

In addition to the maintenance function, Dyn@Link Advanced and Pro also feature the possibility of tracking failures and warnings remotely, keeping downtime to a minimum. Dyn@Link Advanced and Pro are fully integrated in the CAN-bus system of the paver, feeder or roller. Thanks to this integration, all machine warnings are registered and sent to the Dyn@Link portal. This allows your service team or the Dynapac service organization to support the crew on the jobsite quickly and efficiently.

ID	Name	Location	Status
0001	Machine 1	Location 1	Operational
0002	Machine 2	Location 2	Operational
0003	Machine 3	Location 3	Operational
0004	Machine 4	Location 4	Operational
0005	Machine 5	Location 5	Operational
0006	Machine 6	Location 6	Operational
0007	Machine 7	Location 7	Operational
0008	Machine 8	Location 8	Operational
0009	Machine 9	Location 9	Operational
0010	Machine 10	Location 10	Operational

### Service notifications

Dyn@Link offers the possibility to set up maintenance schedules. This helps planning service efficiently, reacting pro-actively to avoid costly breakdowns. After setting up the schedule, e-mail notifications will be automatically sent to pre-defined e-mail accounts when a machine is close to its next service due date. Dyn@Link users have a complete overview of the service status of every machine in the maintenance overview.

**GIVE YOUR FLEET SUSTAINABLE PRODUCTIVITY**

Dyn@Link is an important part of Dynapac's commitment to offer you sustainable productivity. We offer this intelligent solution along with a structured maintenance package to ensure our Dynapac technicians keep a watch on your equipment productivity. Our maintenance packages offer service interventions at designated intervals to ensure preventive main-

tenance with genuine Dynapac parts. These interventions are also a great opportunity for our technicians to provide important application tips to your crew. We also offer an optional DynaPlus program to give you absolute peace of mind. Sign up today for our Service plan with Dyn@Link for your new investment.
